MEMORANDUM

Kristin Cote
Zoning Administrator

TO: Meeker County Planning Commission
FROM: Kristin Cote, Zoning Administrator
DATE: March 25, 2019

The Meeker County Planning Commission will meet at the Courthouse in Litchfield, MN on **April 16, 2019 at 5:00pm** to consider the following Conditional Use Permit applications and other business before the Board.

5:00pm Approve the March 26, 2019 meeting minutes.

5:00pm Mike Wichman (applicant), 12282 180th St, Hutchinson, MN 55350 and Bruce & Jane Smith (owners), 10410 Cain Rd, Rogers, MN 55374. Property located at 27837 CSAH 4, Dassel, MN 55325. Lots Six & Seven (6&7), Arvilla Shores, Lake Arvilla, Dassel Township. An after-the-fact Conditional Use permit application to move more than fifty (50) cubic yards of material in the Shoreland District and more than ten (10) cubic yards of material in the Shore Impact Zone for shoreland alterations in the R-1 Suburban Residential District and within the Shoreland District.

5:05 NOTICE OF APPLICATION FOR LIVESTOCK FEEDLOT PERMIT

Notice is hereby given per Minnesota Statute 116.07 subd. 7(a) that **Sparboe Farms, Inc** has made application to the Minnesota Pollution Control Agency and Meeker County for a permit to construct or expand a feedlot with a capacity of 500 animal units or more.

The existing feedlot is located at the **SW ¼ of Section 16 of Darwin Township (T119N, R30W), Meeker County, Minnesota.**

The existing facility consists of total confinement barns with solid manure storage areas. These barns hold a total of 1,806,808 laying hens less than 5 lbs. (3,761.55 AU). This facility is currently permitted by Meeker County for 5420.4 AU's. Additionally, the site has 3 above ground, aerated, liquid egg wash treatment and storage tanks.

The proposed facility will house 2,047,500 laying hens less than 5 lbs. (5,420.42 AU) housed in total confinement barns with solid manure storage areas. Six existing high-rise style layer barns housing a total of 469,308 laying hens are proposed to be demolished and replaced with the construction of two buildings with an enrichable colony style housing system, 147'x450' in size, housing a total of 720,000 laying hens resulting in an increase of 250,692 layers or 752.076 animal units. The two new buildings include belted conveyors that continuously transfer the collected litter to a new enclosed 10'x394' truck loadout area. Egg wash water is collected and treated in an existing, aerated, above ground, 30' diameter, 28' tall, steel tank and then stored in two, existing, aerated, above ground 90' diameter, 26' tall steel tanks before land application by irrigation. **The total animal units after expansion will be 6,142.5.**
